Welcome to

Ordering

Making your purchase so simple. Once you have looked through the catalogue and made your choice, take a selection form (these are some included in this catalogue as well as

in-store) and fill in the catalogue number and the quantity of the goods you require. Then take the form to a service point. Whilst you are paying, your goods will be collected from our stockroom and brought to the collection counter ready for you to pick up.

Superstore Delivery Service

If you live within 20 miles of one of our Superstores you will be able to use our Superstore telephone ordering/delivery service. As well as our "Free Home Delivery Service" on selected areas (see opposite page), you can also order any other items and have it delivered to your door, for a small delivery charge. As long as you live within 20 miles, you can order either by going along to your local Superstore, or by telephoning your order from the comfort of your own home or office during normal working hours. All you need to do is telephone your local Superstore, quoting your name,

credit or debit card number, and item details, and we will take care of the rest. (Superstore telephone numbers are listed on the back of this catalogue.)

Welcome to the famous Argos catalogue. We have compiled this catalogue with you in mind, to offer you a great way of shopping for a huge range of quality products, at prices you will find hard to beat. The Argos secret is simple. We have developed a way of shopping, designed around you and for you. So all you need to do is browse through our catalogue at your leisure and select exactly what you want - Argos really does take care of it. It is this that is only the start. Our buyers are committed to obtaining only the

best - and if any product does not meet our Safety and Quality standards, it does not get into our catalogue. For your complete peace of mind, we support our commitment to quality with comprehensive guarantees and a first-class after sales service. (See over for details.) To give you, our customer, the best, we also have a host of services to make your shopping even simpler and more enjoyable. These include: free home delivery (on selected items), and Extended Product Guarantees. Both reinforce our

commitment to giving you a better service. So, if you're looking for a huge range of quality goods and services at

competitive prices - and a way of shopping which is designed around you - Argos takes care of it.

Ways to Pay

You can pay for your purchase with any one of the credit cards shown, with cash or with the SWITCH-DEBIT card. You can also pay by cheque and, unlike many retailers, if you have a valid cheque card, we will give you immediate clearance on cheques up to £500 (subject to status).

Argos Personal Account

Open an Argos Personal Account and you can:

- have up to £1000 instant credit with an deposit*
- purchase items when you want them
- spread the cost to suit yourself.

It works like this:

You decide how much you want to spend each month and we will then give you up to 24 days that amount as a total credit limit*.

Monthly Payments	16	32	64	96
Instant Credit of	£120	£240	£480	£960

The table above gives some examples.

If you are over 18, just fill in an application form and hand it to one of our sales assistants, or post it to the address shown. When your application has been accepted*, you will receive your Personal Account Card. You will also receive regular advance notice of promotions and offers we're running. Interest of 2.35% will be charged on the outstanding balance of your account each month. This means that

an Annual Percentage Rate (APR) of 32.1% is charged if you pay through Business Order (Standing Order) (National Giro Order, eg if you purchase the Hitachi Video Cassette Recorder (catalogue price £279.99) you can make 32 repayments of £14 each and 1 repayment of £10. The total amount payable will therefore be £448.45. (This assumes the APR remains constant over the period of repayments.) Interest rates quoted are correct as at 21st January 1991 but may vary. A leaflet containing current interest rates and full credit details is available from any Argos store. Applicants must be 18 years of age or over. Written details are available on request. *Acceptance limited to status.

Free home delivery on selected items

Where you see this symbol against a product we will deliver the item FREE, direct to your door - anywhere in Great Britain or Northern Ireland. (As these items are generally big and bulky they are not available for collection from our stores.)

You can order from any of our stores or you can phone our FREE LIFELINE ORDERING NUMBER. Simply call 0800 700 990 to place your order using any of the major credit cards shown on this page. You can call 24 hours a day, 7 days a week giving your name, address, telephone number, and credit card details, along

with the catalogue number and description of the item you wish to purchase.

Whether you order these selected lines from home or from an Argos store, delivery will normally be made within 14 days. (Unless otherwise indicated in the description of the item or at the time of ordering.)

Please note: This lifeline number can only be used for placing orders.

Argos takes care of it

Argos

Quality, Safety and Services

Quality

We want you, our Customer, to have total confidence that every item you purchase from Argos is **SAFE**, **RELIABLE** and of the highest **QUALITY**. We have therefore developed a large Quality Control team, fully dedicated to fulfilling such requirements and we believe that the time and care we take on Quality Control is the envy of other retailers. In many cases, we even undertake to have the products we sell tested by independent test laboratories. We also carry out random inspections of deliveries to our warehouses on a regular basis, and the performance of all our products and suppliers is monitored continuously. Coupled with this care and commitment is our policy to select and stock top quality

brand names, that you can trust, so you see Argos really does take care of it.

The Argos Promise

The following guarantees do not affect your statutory rights.

If you change your mind and decide that a product you have bought does not meet your exact requirements we offer you the opportunity of returning it within 10 days of purchase, for a full refund or exchange.

We simply ask that it is returned in its original and unopened condition, with its original wrapping and your receipt. Please note this promise does not apply to savings for period cars.

Please note: Some of the goods which are shown in the catalogue may vary slightly if a supplier has changed or altered their specifications after the catalogue has been printed. If this should happen, we will try to help by offering you alternative goods of a similar specification and value to your original choice.

NB: All sizes, weights and capacities quoted are approximations.

After Sales Care

Argos Services

Tax Free Shopping

If you are an overseas visitor you may qualify for a VAT refund. If you do, our tax-free shopping service could save you at least 10% of the cost of your purchase. In order to qualify, you must have been in the UK for no more than 300 days in the last two years, and you must intend to leave Great Britain with your purchases, within the next 3 months. Ask in any of our stores for further details.

Hexagon Insurance Services

We have a wide range of quality home and motor insurance policies available through Hexagon Insurance Services. Their prices are extremely competitive and their policies can offer you excellent cover and protection to give you that extra reassurance. Hexagon Insurance is arranged through a leading UK broker with access to many insurance companies including various underwriters at Lloyd's of London. Why not phone Hexagon for a quotation? See page 46 for further information and details.

AA Membership

We'll give you a free AA gift voucher. Our price of £65.25 gives you access to the world's largest motoring organisation, with a special pack including an immediate membership certificate, member's handbook, licence disc holder and official registration form. All you need to do is complete a selection form with the following number: 7504523. So, if you are after worry-free motoring, let the AA and Argos take care of it.

Film Processing

We have an excellent film processing service at very competitive prices. Envelopes are available in our stores and we can handle all popular sizes of film. Your prints will be developed by experts and delivered directly to your home. Just pick up an envelope in-store for all the details.

Safety

All our products, especially nursery and toy products, are subject to strict safety regulations and we take every care to ensure that all our products are safe.

Safety Accessories

Apart from ensuring the quality and safety of the products we sell, we also stock accessories to ensure your safety when using certain products. For instance, we sell circular saws to use with electrical products as well as protective kits for use with DDT and gardening equipment. In order to care for your home and family we also sell a variety of safety devices for use around the house ranging from smoke detectors and automatic outside lights to child safety products.

Safety Symbols

The Lion Mark is a symbol of toy safety and all Argos toys are tested for compliance with exactly the same approved safety standard.

The "CE" mark is also a symbol of toy safety and is part of a campaign by the EEC to improve safety standards across Europe.

Making sure that you are happy with your purchase, both when you buy them, and when you have taken them home, is very important to us.

If a product develops a fault, simply return it within 30 days of purchase and we will offer you an exchange or a full refund. If a fault develops and the product is returned to a store more than 30 days after purchase but within the manufacturer's guarantee period, we will provide a free-of-charge repair facility, normally within 16 days. And don't forget that we can arrange to have many electrical appliances serviced in your home. So, if there is a problem, let Argos take care of it.

3 - 5 Year Extended Guarantees

To reinforce the Argos policy of selling high quality products at superb prices

we are offering, in addition to our manufacturer's guarantee, an Extended Guarantee scheme. This gives you the extra reassurance of knowing that you have safeguarded

yourself against possible repair costs after the manufacturer's guarantee has expired, and that expert help is always available.

For a modest single payment we can arrange insurance cover for you, for up to a total of 3 or 5 years after you have made your purchase.

Our guarantees (which are arranged through Cornhill Insurance) are available on a wide range of products - from microwave ovens to televisions and from mail systems to cameras.

So when you are choosing your purchase, and for that extra peace of mind, why not protect yourself for the future by taking out our Argos Extended Guarantee. Pick up a leaflet in-store for details.

Argos Gift Vouchers

If you want to take care of a birthday, anniversary or any other special occasion, an Argos Gift Voucher could be the answer. Please note that, unfortunately, we cannot exchange Gift Vouchers for cash.

Product Information Leaflets

To help you select the product which is best for you, we have produced a wide range of product information leaflets. These leaflets explain some of the more complicated features of the products and help you to make comparisons between them.

For this catalogue we have produced leaflets covering these areas: Elizabeth Duke - our jewellery range, Cameras, TV/Audio, and Personal Stereo products, Telephones and Answering Machines, Keep Fit Equipment, Power Drills, Child Safety, Microwave Ovens, Power Garden Tools and Toy Safety. Look out for them in your store. Details of all these areas can also be found in your catalogue.

Elizabeth Duke

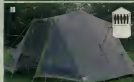

Discover one of the most respected and friendly names in Jewellery Elizabeth Duke at Argos. We have an exciting range of beautiful, top

quality jewellery and watches at excellent prices, for everyone and for every occasion. You can browse and choose at your leisure and our staff are available to offer help and advice whenever you might need it. All of our jewellery carries a one-year guarantee of materials and workmanship and for that extra reassurance we can also provide you, upon request, with a valuation certificate for insurance purposes.

IN SHOWROOM

There are many powered garden tools available today to help make the effort out of mowing your garden look beautiful. But which, from the large range at Argos, do you choose?

Mowing for Your Lawn
In choosing a lawnmower, 3 questions need be asked – whether you require grass collection, whether you want a striped effect and how big your garden. Having answered these, the choice is a lot simpler.

Safety
ALWAYS take care when using powered garden equipment. Follow the manufacturer's instructions, wear suitable clothing and safety equipment, keep children and pets well away and always fit a residual current device (RCD) to the electric socket.

Power

Electric mowers are lighter to use, offer speed and convenience and are generally small and manoeuvrable. The larger the motor, the bigger the power output. Petrol mowers, on the other hand, offer greater freedom and power, and are generally more suited to the larger garden.

Choice of Cut

"Cylinder" is the traditional method for cutting and stripping your lawn. "Rotary" is available in wheeled and hover varieties. Most wheeled rotary blade machines can collect grass, have rollers to stripe the lawn and can be electric or petrol-powered. Hover mowers are mainly electric-powered. Some simply cut the grass, some also have a grass collection box and some can even stripe the lawn.

Mowing for Your Garden

Grass Trimmers

Cut grass around areas inaccessible with a lawnmower using a length of nylon line, spinning at speed. Some models may also have an edging facility, for trimming the edge of a lawn by a flower bed, for example. Grass trimmers may be electric or petrol-powered.

Hedge Trimmers

Work using a scissor action, and may be corded or cordless.

Lawnmowers

Take the effort out of mowing the lawn. The teeth on the cylinder rotate to mimic the lawns as the depth chosen by you.

Garden Shredders

Mix your garden waste into a smaller size, enabling good compost to be produced much more quickly.

POWER DRILLS

We cover the full range of power drills—enough to tackle almost any job. To help you choose the tool you need, we explain some technical terms here.

Input/Wattage

Indicates the power of the drill. Tough jobs need a higher rating here.

Chuck Size

Refers to the diameter of the largest drill bit chuck that can be used.

Two-Speed Drills

You can set the drill speed to a faster or slower speed, to suit the job in hand.

Variable Speed Drills

You have even greater versatility for different materials and jobs. Slower speeds can be set for drilling large holes, higher speeds for small holes. A dial selector, to set the maximum speed, is often built into the trigger.

Electrical Diode

A type of resistor switch to change the drill speed.

Gear Box

Speeds changed by moving a small lever to literally change gear.

Reversing

A useful feature, to rotate the drill in the opposite direction to normal. A variable speed drill can therefore be used as a screwdriver.

Torque Control

This monitors the "resistance" encountered by the drill bit, sensing damage to the motor when impenetrable walls are found.

Hammer Action

Without this, masonry and concrete can be very tough! The drill bit both rotates and hammers its way into the wall, thousands of times a minute.

Cardless (rechargeable) Drills

The freedom to work away from mains power. Additional features like variable speed and reverse are now available to allow these drills to also double as screwdrivers. (Cardless screwdrivers cannot double as drills—the motor lacks the power.)

Voltage

The higher the voltage of a battery, the more power potential the drill has.

SAFETY FIRST always take care when using power tools—keep cables tidy and in good condition. Use protective gloves and goggles. Keep children away from the work area.

CHILD SAFETY SEATS

Over 7,500 children are killed or seriously injured in car accidents every year. It is now law that children under the age of 14 must be correctly strapped into rear seats of cars where straps are fitted. For further information regarding use ranges of car safety seats, please see page 265.

Smoke detectors provide an early warning system setting off an alarm loud enough to wake the family. Smoke and fumes are the major causes of death in house fires without fatalities occurring straight - and once a fire starts you could have as little as 3 minutes to escape. All Argos smoke detectors comply with the British Standard BS 5446 Part 1 and carry the "Fire Mark". Complete with all instructions, fuses and batteries necessary for use. Smoke detectors are endorsed by the Fire Authorities, LONDON 300 SMOKE ALARM, loud & still, low battery indicator and full on/off testing. Complete with batteries.

KEEP FIT EQUIPMENT

FOR MORE DETAILS
SEE OUR LEAFLET
IN SHOWROOM

To help keep your shape, Argus has pages of equipment—the best range in the lightest. You can develop both your strength and your stamina using the equipment we offer.

A word of advice—if you are unwell or have had recent respiratory trouble, consult your doctor before commencing a fitness programme. Don't overdo it! Whilst it is best not to exercise, but exercise should not be painful. Our equipment can take punishment through our safety and quality policy ensures every effort is made to see that all products are strong, and safely constructed. Where appropriate products are tested to comply with approved safety standards.

Most items include a guide for use—your best friend for your chosen equipment—please refer to this guide.

Weights

The basic exercise tool for building strength. Vinyl discs are easier to use than cast iron discs, but are larger, weight for weight. As they do not mark floors they are useful for indoor workouts.

Benches

All Argus benches have been tested for stability and strength. Benches make exercising with weights more effective, allowing greater body development. Many have optional attachments, such as the leg lift, to develop specific body parts.

Exercise Cycles

Our extensive range reflects the popularity of this kind of exercise. They help build stamina, and aerobic capacity, by using the blood to transport oxygen. More expensive machines have a smoother action, making for more productive and enjoyable exercise. Dual-action cycles allow you to pedal and "row"—exercising both the upper and lower body.

Rowing Machines

Excellent for all-round exercise. Hydraulic actions give a smooth flow to your exercise.

"Body Tones" are sophisticated multi-position rowing machines giving scope for a variety of exercises.

Treadmills

These enable you to replicate jogging and walking to build stamina.

Multi-Gyms

A complete exercise frame and body building exercise for muscle development and stamina building. These machines have fully adjustable weight loads. Most are large and heavy—make sure you have somewhere suitable to store it. If you're unsure about how fit the machine gets is what you need.

CAMERAS

FOR MORE DETAILS
SEE OUR LEAFLET
IN SHOWROOM

We have made a careful selection from the enormous range of cameras available today, and offer everything from about 118 to the most sophisticated 35mm compact. Something to fit everybody.

110's
Lightweight, easy to use cameras, with a fixed-focus lens - ideal for snapshots, without any complications. Most have built-in flash for indoors. Compact film is simply dropped in the back!

35mm Compacts

These vary from the straightforward to the very sophisticated - but all are easy to use. Sharper, clearer pictures result from the quality lens. Some of the features available are described here.

Motorized Load

Open the new film in, dust the camera back and the film is automatically set ready for the first picture.

Motorized Film Advance

Automatically winds the film on ready for the next picture.

Motorized Rewind

When the film is loaded, a switch rewinds the film. With automatic rewind, the camera unsets the film and and operates the rewind motor.

Zoom Lens

You can compose your picture by adjusting the lens. Your subject will appear nearer or further away as you "zoom".

Auto Focus

The subject in the centre of the viewfinder is automatically focused by the camera.

Auto Exposure

The camera adjusts automatically for the light conditions - perfect pictures!

Sensor Flash

The camera detects when there is insufficient light and automatically operates the flash.

IR in Flash

The flash fills in foreground shadows in bright conditions.

Film Speed

Film speeds indicate the film's sensitivity to light - "Fast" films with a high ISO number (e.g. ISO 1000) will take pictures in poor light. "Slow" films (e.g. ISO 100) require good light - normal daylight. Compact cameras should be adjusted to the speed of the film used. Straight forward models usually have a simple switch.

EX-coupling

Some compact cameras have a facility which "links" for you the speed of the film you insert. The camera automatically adjusts, avoiding human error.

BEDS EXPLAINED

At Argos we offer a wide variety of beds to suit most types of sleeping habits at competitive prices.

Choosing the best bed for your own requirements can be difficult. Our range covers most types of beds and mattresses available, from single divans, back rest posture beds to double divans with storage and foldaway visitors beds. When choosing your bed the combination of mattress and base play an important part.

The ultimate sleep system.

The springing system has continuous support spirals which provide support right to the edge of the bed, maximising the sleeping area. Spirals also prevent partners rolling together. The mattress and base have posture zones to provide maximum support.

Traditional coil springs form the basis of the mattress. Natural layers of upholstered materials are matched to a "breathing" natural fibre insulator. The tailored outer cover, made from a durable printed fabric is placed on top to complete the mattress and base unit.

Our Lay-Z-Zee Springing System supports with natural and natural materials. This new springing system allows the bed to breathe and sleep better.

Traditional coil spring units are covered with a unique bonded core fabric pad called "Flex" which virtually eliminates spring feel. Softer upholstery layers are then placed on top to form a composite mattress of an "Orthopaedic" type. An attractive fabric ticking is then used to cover the mattress and divan base unit.

From £1, 4, 7, 9-11 and 12 will be delivered direct to your home. They are not available for collection from our showrooms. Delivery will normally be made within 14 days. Full details are available at all Argos Showrooms.

MICROWAVE OVENS

Timers
All our microwave ovens have timers, so the oven switches off automatically after the cooking period.

Golden Story Times

This enables the start time to be pre-set so food can be cooking while you are out, timed to be ready for your return.

Multi-Stage Interviewing Considerations

This facility allows food to be defrosted, cooked at a high level and kept warm on a low power level until it is ready to eat.

Auto Coach Course

By pressing appropriate buttons the microwave oven is easily programmed to operate for a specified length of time, and at one of a number of power levels.

Arctic Mountain Cemetery

Simply key in the weight of the hoist load and it will be automatically delivered for the required length of time.

1999

This facility will brown and crisp your food and give it the same appearance as conventionally cooked food.

If you are buying your first microwave oven, you may need some additional non-metallic cookware. Select from our range on page 158.

A quick, safe and effective way of cooking and heating food and drinks, and energy-efficient too. As microwave ovens selected by Angus have a rotating turntable to ensure even cooking of the food, and all comply with the most recent tests on thorough heating and output standards. Some of the terms used are explained below.

Current Power Methods

This is an important feature of all microwave ovens. The higher the wattage, the more capable the oven is of heating food. Faster cooking times can be achieved, or greater quantities can be cooked.

5

For family usage, an oven of 6.5 cu ft or above is advisable.

NEW INTERNATIONAL
MICROWAVE OVEN SYMBOLS
During 1991 all new microwave
ovens sold in Europe will be
given a power rating and
symbol which will help to
explain the "actual" power of
the microwave oven. They will
replace the current system of
rating by wattage.
Head manufacturers will also
start to use the new symbols
during 1991.

The symbols had not been
finalised by the time this
catalogue was printed so please
continue to refer to the stated
wattages for the duration of this
catalogue.

Cameo
Popular since Roman times each cameo is individually hand carved in Italy. Only two or three carvers are carved from each concha shell making every piece unique.

CHILD SAFETY

FOR MORE DETAILS
SEE OUR LEAFLET
IN SHOW ROOM

Asleep and awake comprehensive range of child safety products tailored to ensure your child is taken care of both inside and outside the home. All child safety products will are tested to comply with approved safety standards. In addition, we have taken to BACS (The Royal Society for the Prevention of Accidents) and together we have compiled safety suggestions, available from our in-store leaflet.

HOME SAFETY

Like most people you probably feel safest when you're at home, but how safe is your child? Every year around 250 children are killed and 500,000 need hospital treatment because of what should be preventable accidents.

What can you do? Every room in the house has its own hazards and you can't be with your child 24 hours a day. Find out at what age your child is capable of crawling, walking and climbing to see what are the most serious accidents children suffer. Use this information to make your house as safe as possible. But remember, there is no substitute for supervision.

Staircase Safety: Keep landings and stairways clear of toys to avoid tripping, and always use a properly fitted safety gate. Some children are afraid of the darkness you may find it reassuring for you and your child to see moving lights and baby monitors. At bedtime, always use the master fire bellows putting your child to bed in the same building, and never leave them alone, even for a minute.

Kitchen Safety: Keep a high stool area, especially when it's used. Keep sharp objects, medications, cleaning chemicals locked away and out of reach, and install a child lock for your electrical kitchen appliances. When you child is on the kitchen, it's best to use a high chair, so that your child is securely strapped in and out of harm's way. And never leave your child unattended.

Playtime Safety: A time for fun and learning, but care is still required, particularly in the choice of toys. Younger children should never be allowed to play with older children's toys as they may contain small parts a younger child might choke on. If using a bouncing cradle/bed, make sure your child is securely strapped in on a smooth non-slip surface.

TELEPHONES AND ANSWERING MACHINES

FOR MORE DETAILS
SEE OUR LEAFLET
IN SHOWROOM

The range of telephones available on Angus is one of the best in the high street. The many telephone lounges available include —

Last Number Ke-Dial: The phone remembers the last number dialed and with the press of a button, will automatically re-dial it.

Memorized. The numbers you use most often can be stored in the phone's memory and dialed by pressing only one or two buttons.

Make sure you know how to get the phone off "on hold" - useful if you need to talk to someone without the caller overhearing.

On Hook Drafting: You can dial without picking up the receiver. You can hear when your call is answered and you then pick up the handset to speak.

Hands free speeds- usually combined with in-vehicle dialing. by pressing a button you can lock and speed with the engine is idling.

★ **Star Services** - British Telecom are currently installing Digital exchanges and these will soon be available in central and most of the country. Facilities available include call diversion, call calling, repeat/transfer, call waiting, call barring, remote call and three-way calling. In order to access these new services, your phone will need to be multi-frequency or "Touch Tone" compatible.

Key equivalent number (KEN) determines the number of telephones you can connect to a line. The maximum total KEN for a PABX is 4. **Mercury**. It is now possible to make calls at

the "Mercury" network by dialing into the network and entering a personal code. Some telephones now feature a blue "Mercury" button which allows one touch dialing into the system. Other "Mercury" compatible telephones enable long distance calling at a special rate.

Cardious Phoset - gives the user the freedom to talk on the phone away from the base unit, by use of a portable rechargeable handset, within environmental and range limitations.

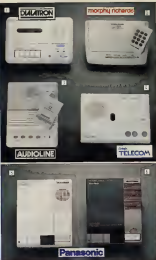

Answering Machines. These machines will answer your phone if you cannot answer it yourself. You need a new *mylife!* phone socket and a nearby Thame mauna socket. Some answering machines are confused with a telephone in a situation.

Call Forwarding: allows you to let the machine take a message while you listen in to see who is calling, so you can choose who you

Message Facility allows you to leave a message if you stop here for someone else to accept or check return.

Remote Control allows you to call your own number and playback any recorded message from any phone, anywhere. Some features are voice activated while others require a control device which produces coded tones. *Touch Tone is a registered trademark.

CORDLESS TELEPHONES

COMPARISON WITH HPHONE'S

Cordless phones give you the freedom to talk using a portable handset within a 100m range of the base unit, subject to environmental conditions. They are susceptible to interference from other phones and radio transmitters, particularly when used from a distance. Reception may not be as clear as a conventional phone and it is important to follow the manufacturer's installation instructions. The handset indicates on the base unit, therefore cordless phones require such a telephone jack socket and a 23 amp power point to be adjacent to each other. Cordless phones without battery back-up will not operate during power failure. For full details of cordless phones please refer to both text and chart.

For any queries about your condition please ring the appropriate helpline number during office hours.

AUDIO/ PERSONAL STEREO

VIEW MUSIC DETAILS
SEE HOW EASY IT
IS TO USE OUR

Newcomers, there are no-tuning features available on audio equipment that not all of them are readily understood. Our aim here is to enlighten some of them. You can obtain more information from the following:

Compact Cassette Players

The most accurate visual reproduction available on tape, click to see as you wish get from tape to records. The player reads the "shaded" sound from the tape to the cassette player's own facilities to find the track you want, and are programmed to play the track in the order you want.

Personal Compact Cassette Players offer many of the functions provided by standard cassette players, but are portable too.

Cassette Decks

High Speed Dubbing allows you to copy from another cassette at speed much faster than normal playback.

Continuous Play is only available on two-track machines. When one tape finishes, the other can start immediately.

Dubbing "B" & "C" are built-in systems which reduce tape hiss, often noticeable on "quiet" music.

Auto Reverse changes the direction the tape plays when one side is finished. Thus both sides play one after the other.

Personal Stereo

Auto-Roll On personal stereo you may find an auto-roll device which it automatically plays back after you have the side which is on the tape.

Step Down To get a richer fuller sound, the low level facility enhances the lower frequency levels of the sound.

Radio Tuners

Digital Tuners scan the whole wavelength, rapidly scanning the frequency spectrum. Once tuned in, they stay "tuned" on the desired station eliminating "drift" and "fade". Quartz, PLL and semi-conductor digital tuners are more sophisticated versions.

Pre-Set Buttons enable you to store your favourite stations' positions in a memory and recall them with the touch of a button.

Graphic Equalizers

These are incorporated into controls which allow you to "shape" the sound you hear by adjusting the tone "banks". The more banks, the greater the degree of control.

Power Output

Manufacturers' normally express the potential maximum volume of an audio product in one of three terms (Watt) (V) (A) (P) and (W) (P) (C). To compare these different terms an approximate guide is:-

1WATT = 2WATT = 4WATT

The higher number of watts, the greater the capacity of the amplifier and the louder the sound will be.
